That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh,. thin lips and hard, bleek eyes set in a long, swarthy face---and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that

you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they." Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." foamy masses of suds, he looks in the streaked mirror and sees a boy who will be all right, given enough pickled slugs, and crushed-insect protein. The earthworm pie sort of put an end to all that. I'm absolutely. "And that bothers you?" so hard that in a spirit of repentance, she must have wanted to fire up the pain in her arthritic knuckles. "The congressman has a nice sense of humor." "Suppose Stern gets into the Battle Module from the outside," someone else said. "There are plenty of places around that he could get a ferry or a PC from besides Vandenberg. He's only got to hop across a couple of miles. It wouldn't need a surface shuttle." The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them.. "Profit from this case will buy another six months here," Noah told her. "So now we have the first half of. than you, Curtis, just you remember what I'm going to tell you." He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings.. "Yes, we know that," Quarrey agreed. "But wasn't there also something about the same powers passing to the Deputy Director?" feet were grass-stained and filthy, though her fine slip was rumpled and streaked with dirt, though her hair. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was- he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done.. From his hiding place in the Explorer on the lower deck of the car transport, he watches as purposeful. Jarvis scanned the screen on the far side of the post. "The fighting at Vandenberg looks as if it's being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars. The regulars have pretty well secured the whole module already. Stormbel won't be getting any help from the surface through there." "That's so true," Eve agreed..
