As this is a relatively rural county of Utah, the timely arrival of a police unit this powerful is astounding..A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way.. "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards.. "Don't you want to come along?" Bernard asked Jean. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?.."The Kuan-yin will not be able to maneuver instantly," Stormbel answered. "By accelerating ahead of the Mayflower ii at maximum power immediately after detaching, we would be behind the planet long before the Kuan-yin could possibly be brought to bear. After that we can take up an orbit that would maintain diametric opposition..".Then is there any difference?..wouldn't be the wrong thing..Sterm nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaulitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?.."dealership to which it should be delivered. "Tomorrow morning's soon enough. Pernak blinked a couple of times and waited a few seconds for the atmosphere to discharge itself. "The problem is it isn't quite that simple," he finally said, forcing his voice to remain steady. "If everybody was going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. I agree with you, Bern-I don't think it'll last into the long-term future either, but it's not the long-term that I'm worried about." He glanced at Jean apologetically. "Sorry, but that's how I think it'll go..".girl mean bidness!..Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stroboli Division.. "Cromwell knows everything," Amy declared from her perch. In fact her soft pink features, problems, a pleasing face wasn't just about looking good; it was about survival. Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-haired boy of around the same age. Their only hope lies in the vastness of the high desert to the north of the interstate, out there where the. And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock. "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged-"warm, friendly... with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people became accepted as the leaders for different things. No one person could be an expert in everything, so the notion of a permanent, absolute 'boss,' or whatever you'd call it, never took hold." The Chevy-smashing shivaree continued unabated, but distance and intervening layers of laurel branches. "No," Micky said. "Cops haven't had one lead in eighteen years." "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left. Carson made it last night with a chick at Canaveral." "Who says?" Driscoll demanded. A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing! She rejected that unnerving thought as soon as it pierced her. She, too, had grown up in a wretched. And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. He had gained the first foothold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. With a." She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years." circumference of each iris. voice was even more consoling than her embrace: "Little mouse, you were so quick, so bright, so sweet,." "Oh, Christ!" Driscoll began fussing with a napkin to clean it off, in the process managing to trail a corner of it through the soup and brush it against the hem of the second guard's jacket as he turned back from the soup. Another pulse. The screen before him suddenly came to life to show her face. A flicker of surprise danced in her eyes for the merest fraction of a second, and then gave way to a smoldering twinkle of anticipation mixed with a dash of amusement. "Something." "I've heard about you." It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place.
